# Yeast + Flour + Water + Milk + Eggs + Butter = Bread

## Making fresh bread is rewarding & fun!

**Step one:** bloom the yeast in warm water - look for the foam!

**Step two:** combine your dry ingredients in a large bowl!

**Step three:** combine your wet ingredients in a small bowl!

**Step four:** add the wet to the dry

**Step five:** knead the dough together with more flour until it is smooth and elastic

**Step six:** wait! Bread takes 1 1/2 to 2 hours to rise until it is double in size. Make sure it's in a warm place!

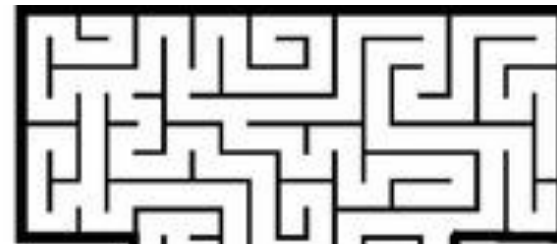

**Step seven:** roll your rolls! Brush them with butter and let them rise again! Remember, be patient, it's worth the wait!

**Step eight:** bake your bread until it is golden brown and delicious.

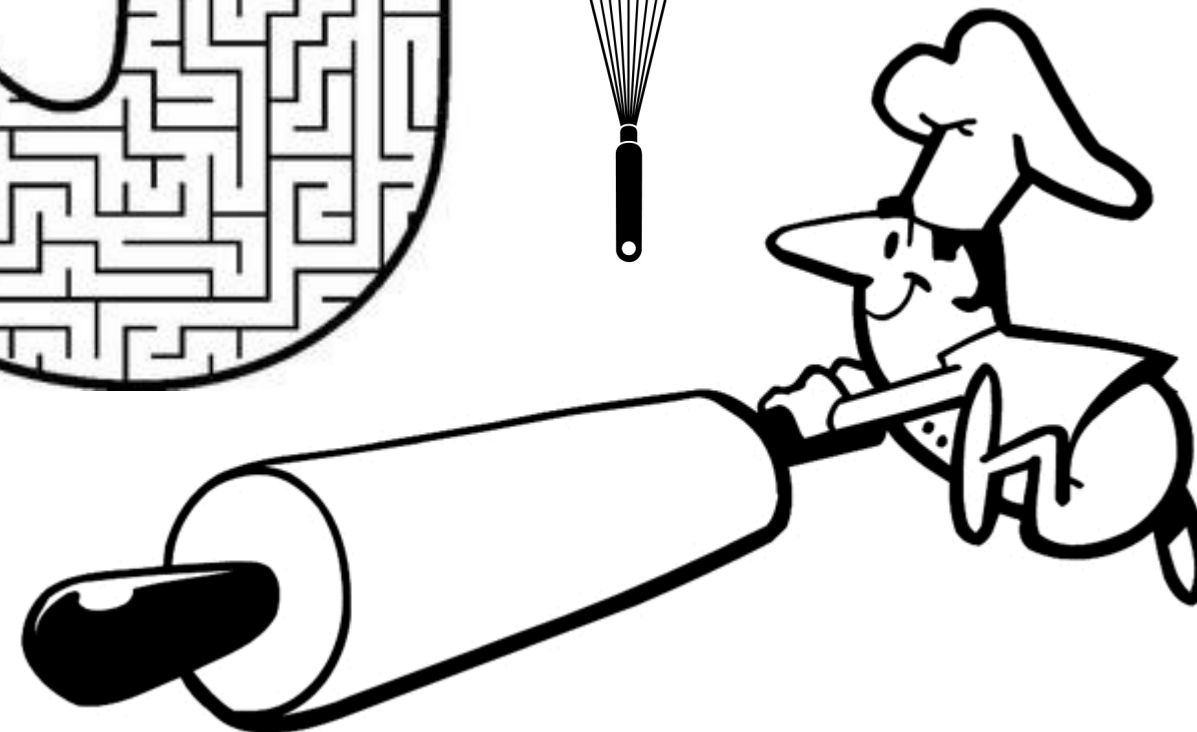

**Step nine:** spread on the blueberry honey butter and enjoy!
